Although the tradition of writing history was established by the Greeks, and one should not underestimate the scope and sophistication of ancient historiography, the ancients did not develop the study of the past as a special research programme. The modern approach to history includes the systematic study of the past in its various aspects. Such a study aims to cover all important aspects of a given society, civilization or culture, to arrive at both detailed knowledge and comprehensive interpretation of a given epoch or phenomenon. This approach finds its expression in the leading role of the monographic essay, be it a book or a journal paper.

The discovery of this black hole contributed to the understanding that holes of such size and mass are able to increase these figures very quickly. Manipulation of memory. Sounds like the seed to some Kolanowska "the Beginning", but in 2014, scientists Steve Ramirez and Xu Liu conducted a manipulation of memory laboratory mouse, replacing negative memories to positive and back. Scientists cannot with absolute certainty say whether there were such features of the planet in the past, but the presence of water on the planet now opens up many prospects. For example, the presence of water on the planet is able to provide great assistance, when humanity will finally collect a manned mission to Mars (sometime after 2024, according to the most optimistic forecasts). Although the tradition of writing history was established by the Greeks, and one should not underestimate the scope and sophistication of ancient historiography, the ancients did not develop the study of the past as a special research programme. The modern approach to history includes the systematic study of the past in its various aspects. Such a study aims to cover all important aspects of a given society, civilization or culture, to arrive at both detailed knowledge and comprehensive interpretation of a given epoch or phenomenon. This approach finds its expression in the leading role of the monographic essay, be it a book or a journal paper.
