

SCHOOL PSYCHOLOGY

DEGREE PROGRAM (M.S.E.)

The Master of Science in Education (M.S.E.) Program is part of a three-year, 67-credit program which fulfills the academic requirements for licensure as a School Psychologist. This area of study concerns itself with the application of psychological theories and skills to prevention and intervention procedures with children and youth as they interact within the school environment. It provides comprehensive knowledge in psychological and educational foundations and extensive training in assessment, therapy, and consultation practices. Completion of the three-year program leads to Department of Public Instruction licensure as a School Psychologist.

The curriculum is designed to provide an advanced understanding of content areas necessary to meet requirements of School Psychology as defined by the National Association of School Psychologists, the American Psychological Association, and the Wisconsin State Department of Public Instruction Certification for Provisional and (Full) School Psychologists. Students will learn, among other skills, to: complete non-biased data-based assessment of school-aged children and integrate such assessment into treatment procedures; function as consultants to teachers, parents and other personnel in school settings - working as child advocates in school, home and community; and conduct applied research that will benefit the children and families that they serve, and appreciate how such efforts fit into a context of continuing professional development.

Department Secretary:

Winther 5033
Phone: (262) 472-1026

Fax: (262) 472-1863

Email: psychology@mail.uww.edu

Additional Admission Requirements: (See Note)

1. An overall undergraduate grade point average of at least a 3.00. Applicants who do not meet this requirement may appeal for an exception on the basis of other factors (e.g., strong subsequent academic study, outstanding relevant work experience, and/or exceptional personal qualifications).
2. An appropriate academic background in psychology with a minimum of 12 credits including a course in each of the following: child/adolescent psychology or development, abnormal psychology/behavior disorders, and basic statistical methods. The School Psychology Committee may require that specific undergraduate courses be completed with a grade of B or better before the application for admission will be processed.

Students with only a single deficiency may be admitted and allowed to satisfy that deficiency at the graduate level. Such graduate level prerequisite credits will not count toward the master's degree, but will count as electives in the student's total 67-credit course work requirement.

3. A representative sample of the applicant's written expression skills in the form of a typed narrative letter of intent, sent to the Program Coordinator, which includes a discussion of relevant personal background and describes in-depth why the applicant has chosen to pursue study in the field of school psychology.
4. Three letters of recommendation from appropriate persons (such as former professors or work supervisors) who are familiar with the applicant's academic and personal qualifications for graduate study in school psychology. These letters should be sent to the Program Coordinator.
5. The results of the Miller Analogies Test (MAT). This test takes approximately one hour and applicants may arrange to take it at the UW-Whitewater Testing Center or at a similar testing facility at another university. Applicants who prefer to submit the results of the Graduate Record Examination (GRE) in lieu of the MAT may do so. Have all results sent to UW-Whitewater Department of Psychology. It is the responsibility of the applicant to see that the scores are received at the School Psychology Program before the March 1st application deadline. Failure to meet this deadline may result in a denial of admission due to an incomplete application packet.
6. Upon review, the School Psychology Committee may request a personal interview to provide additional information. Admission may be granted with or without an interview at the Committee's discretion.

Note: A completed application packet, consisting of the narrative letter of intent, three letters of recommendation, the results of the Miller Analogies Test (or GRE), and all application materials forwarded by the School of Graduate Studies must be on file with the Program Coordinator by March 1.

Admission Timeline:

The School Psychology Program admits students only in the spring of the year for classes beginning the following fall term. Admitted students are also free to take summer term classes. A completed application packet, consisting of the narrative letter of intent, three letters of recommendation, the results of the Miller Analogies Test (or GRE), and all application materials forwarded by the School of Graduate Studies must be on file with the Program Coordinator by March 1.

Following the March 1 deadline, the School Psychology Committee will review packets and inform all applicants as to their admission status by mail. Applicants with complete application packets who are requesting early admission consideration due to competing deadlines should inform the Program Coordinator with a written request.

Degree Requirements:

Thirty credits consisting of courses required for licensure with specific courses determined in consultation with the student's adviser depending upon individual professional goals and past academic course work. Students may elect a thesis (1-6 credits) or a comprehensive examination. Students must maintain a grade point average of B or better throughout the program. Only one grade of BC or below is allowed in the psychology area and only two grades of BC or below are allowed in the entire program of study. No course in the program may be repeated. A full-time student in good standing may carry a maximum load of 12 credits per semester.

Browse hundreds of psychology schools and programs. No matter if you're interested in Clinical Psychology or Social Work, we can help you meet your goals. The study of the mind and human behavior, psychology is our attempt to understand people and their motivations so that we can help them overcome problems and lead happier, more satisfying lives. There are many sub-fields to choose from, including clinical, forensic, and school psychology, and you'll decide which one is best for you during your studies. School psychologists work in schools to help children with emotional, social, and academic issues. Learn more about careers in this growing field. A school psychologist is a type of psychologist that works within the educational system to help children with emotional, social, and academic issues. The goal of school psychology is to collaborate with parents, teachers, and students to promote a healthy learning environment that focuses on the needs of children. School psychology is still a relatively young profession. School psychologists are educated in psychology, child and adolescent development, child and adolescent psychopathology, education, family and parenting practices, learning theories, and personality theories. They are knowledgeable about effective instruction and effective schools. They are trained to carry out psychological and psychoeducational assessment, psychotherapy, and consultation, and in the ethical, legal and administrative codes of their profession. Historical highlights.
