Published 1980 by Croom Helm in London . Written in English. NBER Working Paper No. 1661 Issued in July 1985 NBER Program(s):Development of the American Economy. It is easier to discover why people died in the past than how healthy they were during their lives.Â The paper discusses the possibility of generalizing from one such source, that of British volunteer recruits, to the health of the male working class. It concludes that the source is not seriously biased and that, after some statistical correction, the data suggest a gradual improvement in the nutritional status, measured by average height, of the British working class.This finding contradicts much contemporary opinion that the British were physically deteriorating in the late nineteenth century.
