Fossil hunters have found dinosaur fossils all over the world. These fossil sites show where dinosaurs lived, during different periods that lasted millions of years. Fossils are usually found in sedimentary rock, which formed near prehistoric rivers. Some are buried deep underground, but others are discovered when wind or rain removes just a thin layer of dirt. Mary Anning discovered many fossils that had been revealed by landslides. Find out more about fossil hunters. Quiz. True or false? Take the fossil quiz! His popularity and his text books on dinosaurs, paleontology, and stratigraphy (with Marshall Kay) introduced a generation of scientists and amateur enthusiasts to the subject. He was the recipient of numerous prizes and awards commemorating his many achievements in the field of science. He became curator of vertebrate paleontology at the Museum of Northern Arizona in Flagstaff, Arizona in 1970. Along with his wife, Margaret, he had five sons. He died at his home in Flagstaff.[1].
