In "Haunted: Tales of the Grotesque" Oates™ brings back the female body to the prosaic realities of everyday life, allowing the grotesque to emerge from familiar and naturalistically constructed scenarios. The abject and its defiling substances are literalized in the daily lives of her characters. As Mary Allen points out, "the female body is a liability always out of control, the centre of pain and the source of excretions that proliferate in Oates™s work: vomit, blood, diseased tissue, menstrual blood, and the newborn child itself, the most terrible excretion of all" (1987, 64).
