

Godfather to All Monkeys: Martin Folkes and His 1756 Library Sale

George Kolbe

I acquired several engravings from David Edmunds around 1980 in London, all depicting the famous English numismatist, antiquary, mathematician, and astronomer Martin Folkes (1690–1754). These prints were finely engraved by Folkes's contemporary, the celebrated painter and engraver William Hogarth. I kept and subsequently framed one of the engravings, sold one to a friend, and disposed of the remainder under circumstances unremembered. In 2013, the portrait was brought to life in a manner when I acquired, from Douglas Saville, the 1756 *Catalogue of the Entire and Valuable Library of Martin Folkes, Esq.*

At the base of the title, "Price Sixpence" is printed, along with the notice that "Catalogues to be had at most of the considerable Places in Europe, and all the Booksellers of Great Britain and Ireland." Though apparently printed in large numbers, my bookseller colleague rather shamelessly charged me considerably more than original issue price for the catalogue. In truth, the price paid was reasonable and the information derived has made it a bargain. It is hoped that the article presented here, despite its unseemly length, will provide the reader some fraction of the enjoyment I experienced from studying the catalogue.

The auction sale was scheduled "By Samuel Baker, At his House in *York-Street, Covent Garden*, To begin on Monday, *February 2, 1756*, and to continue for Forty Days successively (Sundays excepted)." It is an octavo volume, 8 by 5 inches, comprising 156 pages with descriptions of 5126 lots. Following the title is a page comprising the "Conditions of Sale" which, if impossibly brief in today's litigious world, nonetheless covered all the basics in a sensible manner. Following it is a page that is devoted to "Explicationes Literarum Capitalium" (explanations of the capital letters), as follows:

- C. M. Charta Maxima (large paper)
- C. T. Corio Turcico (Turkish leather, i.e., morocco)
- C. R. Corio Russico (Russian leather)
- F. D. Foliis Deauratis (gilt leaves)
- L. R. Lineis Rubris (red rules)
- L. P. Large Paper
- G. L. Gilt Leaves
- R. Ruled
- M. Morocco
- R. L. Russia Leather

The above initials are infrequently employed in the catalogue and, when they are, the Latin abbreviations are generally appended to works in that language, and the English abbreviations to titles in the vernacular. Each day's hundred-plus lot installment is arranged in three categories: Octavo & Infra, Quarto, and Folio. The daily offering of titles presented within these formats appears to be organized in no particular order. The quarto (4°) and folio (2°) works are so designated in the listing that follows; the octavo and infra (i.e., smaller) titles are all designated (8°), regardless of their actual configuration.

An impressive number of works in the Folkes library are of numismatic interest. Each of the several times that the catalogue was reviewed, additional titles were uncovered. Certainly a number of such works remain undiscovered and the compilation of over 300 works that follows should not be considered to be exhaustive. The publications offered for sale in the Folkes library are exceptionally diverse and, in the wider world of those who love books, the works devoted to coins are of relatively minor significance. The following volume, as an example, would likely precipitate heart palpitations in the most mild-mannered bibliophile:

5114 An Abstract of Chronology of Sir Isaac Newton, which Mr. Folkes sent to Sir Isaac, he not being at that time able to find his own, and which he returned with corrections in his own hand, *bound in Russia*, 4to.

Polymaths roamed the earth in the seventeenth century; by mid-eighteenth century the species had become extinct. The proliferation of books in print on a vast multitude of topics had made it virtually impossible for any one man or woman, however gifted, to fully digest an

ever-increasing body of perceived knowledge. That did not keep Martin Folkes from trying, however, as may be adduced from the content of his library.

The classics are present in great abundance, from incunabula to the most recent editions edited by scholars of the day: Terence, Cicero, Horace, Aesop, Pliny, Virgil, Seneca, Homer, Suetonius, Florus, Curtius, on and on. The sciences are well represented: advanced mathematics, chemistry, biology, zoology, astronomy, and medicine, along with works on emerging technologies, mechanical and otherwise. History, from the ancient to the new world, is encompassed in depth, both in general and in particular. Biographies, individual and collected, abound. Fiction was a favorite, ranging from numerous editions and translations of *Don Quixote* to the popular novels of the day. Other topics present in abundance include oceanography, maps and atlases, warfare, ancient and contemporary painting and art, travel, electricity, specific gravity, metrology, music, law, religion, agriculture, farriery, lotteries, ancient sculpture, shorthand, and surveying.

While a number of religious works were present in his library, Folkes was a noted atheist with outspoken views. Manuscript books of hours are abundant, presumably for their esthetic qualities. Various editions of Aesop's Fables are present as well. Another favorite of Folkes was *Orlando furioso*, an Italian epic poem by Ludovico Ariosto. At least eight sixteenth-century Italian editions of *Mad Orlando* are included, as well as a 1634 edition in English. Miguel de Cervante's *Ingenious Gentleman of La Mancha* is present in at least nine editions, including one French and three English translations. Editions of Caesar's *Commentaries* are abundant, including a 1494 edition, and several copies of Boccaccio's *Decameron* graced the shelves of the Folkes library.

The linguistic and temporal composition of the library is not without interest. English, Latin, and Romance languages predominate, with occasional titles in German or Dutch. Over twenty incunables—books printed before the year 1501—are present, rich in the classics but not without a degree of diversity. Among them is a 1493 first edition of the famous *Nuremberg Chronicle*, an illustrated history of the world initially printed in Latin and one of the best documented early printed books.

Martin Folkes was born in Westminster on October 29, 1690. He was chosen a fellow of the Royal Society at age 23 and was appointed a vice-president in 1723 by Isaac Newton. He succeeded Hans Sloane as

president of the society in 1741. In 1742 he was elected a member of the French Academy. From 1749 until his death in 1754, he served as president of the Society of Antiquaries. Following a tour of Italy in 1733, Folkes composed *Dissertations on the Weights and Values of Ancient Coins*. In 1736 he read before the Society of Antiquaries his *Observations on the Trajan and Antonine Pillars at Rome* and his *Table of English Gold Coins from the 18th Year of King Edward III*. In 1745 he published the latter, combined with a work on the silver coinage.

When a boy, Folkes was sent to the University of Saumur, where his tutor described him as “a choice youth of a penetrating genius and master of the beauties of the best Roman and Greek writers.” The library mirrors that assessment, though it is much more wide-ranging. His stewardship of the Royal Society in later life was lengthy yet not without controversy. His contemporary, fellow scholar and antiquary William Stukeley was scathing in his criticism:

Martin Folkes has an estate of near £3000 got by his father in the Law. He is a man of no œconomy. Before at age, he married Mrs. Bracegirdle [actress Lucretia Bradshaw] off the stage. His mother grieved at it so much that she threw herself out of a window and broke her arm. . . . Quarrelling with Sr Hans Sloane about the presidentship of the Royal Society and being baffled, he went to Rome with his wife and daughters, dog, cat, parrot and monkey. . . . Returning he was successor to Sir Hans. . . . Losing his teeth he speaks so, as not to be understood. . . . He chuses the Council and officers out of his junto of sycophants. . . . He has a great deal of learning, philosophy, astronomy: but knows nothing of natural history. In matters of religion an errant infidel and loud scoffer. Professes himself a godfather to all monkeys. . . . He has been propagating the infidel system with great assiduity; and made it even fashionable in the Royal Society, so that when any mention is made of Moses, of the deluge, of religion, Scriptures etc. it generally is received with a loud laugh.

Stukeley’s negative opinion of Folkes seems to have been motivated, quoting a private communication from Christian Dekesel: “by envy for the man who indirectly provided him with a living as vicar of St Georges in Queens Square via his uncle William Wake the then archbishop of Canterbury.” In a lengthy, unpublished 2006 manuscript entitled *Martin Folkes: An English Antiquary*, Dekesel provides a more sympathetic view:

According to contemporaries, Mr. Folkes was a man of great modesty and integrity, polite and vivacious in his conversation, and his only ambition was to be distinguished as a patron of literature. He possessed a sound judgment, extensive knowledge, and a great facility of expressing with clearness and precision his ideas even on intricate subjects.

Martin Folkes was a friend and colleague of Sir Isaac Newton and the library contains several special copies of Newton's scientific works. Folkes was also associated with Thomas Herbert, 8th Earl of Pembroke, and he may have been involved in some manner in the publication of the 1746 collection of plates depicting the Earl's famous coin collection, nine copies of which are interspersed throughout the sale. The Pembroke plates often appear in proximity to the many copies of "Folkes's Tables of English Coins" also featured in the sale, leading one to conjure the vision of a nearby stack of each publication from which the cataloguer of the sale selected one of each when the spirit moved him. Said cataloguer appears to have employed French punctuation marks quite inconsistently (the acute accent, in particular, is frequently omitted), and spelling proficiency (or a proper proofreading of the catalogue) is wanting.

Folkes was clearly interested in metrology and over a dozen works on the topic in Latin, French, and English, dating from the 1500s to the 1700s, are present in his library. Emblem books were also prevalent, some of them with numismatic relevance. The earliest dated volume in the sale is lot "351 A Breviary, in Dutch — — Delf. 1440." The sale features several *bis* listings, designated with an asterisk, inserted between consecutive lot numbers, including two of numismatic interest. An early confluence, lots 418 and 419, provides presumably unintentional comic relief: "Mist's Letters, 3 Vol. — — 1722" is followed by "Fog's Letters, 2 Vol. — — 1732."

To provide a better understanding of the diversity of the Folkes library, a sampling of generally esoteric lot descriptions follows, selected more or less at whim. Clearly, Folkes was no simple simian:

NUMISMATIC WORKS IN THE FOLKES LIBRARY

It is hoped that all, or nearly all, of the works primarily devoted to numismatics in the Martin Folkes library are recorded below. Many works of peripheral numismatic interest, whether or not recorded in Lipsius, have surely been missed. More of those cited in Dekesel's painstaking bibliographies have undoubtedly escaped notice, particularly those in his yet-to-be-published L to Z eighteenth-century volumes (in a characteristically generous example of information-sharing, Yvette and Christian Dekesel graciously provided reference numbers to the unpublished eighteenth-century volumes, finished except for the illustrations, and said numbers have been added within brackets in the following compilation). A number of the classics and works on ancient history in the library may well be numismatically relevant, yet are beyond my ability to identify them as such without at least a perusal. Descriptions of other titles may be so brief or inexact as to defy proper identification. To charges of a certain level of ignorance and an unwillingness to spend many additional hours researching each and every title with possible numismatic content, I plead guilty.

The impressive wealth of works on ancient numismatics published by the mid-eighteenth century throughout Europe is proportionately represented in the Folkes library. Among these volumes are the famous 1522 Aldine Press edition of the first numismatic book, Budé's 1514 *De Asse*; accompanied by the complete numismatic *oeuvre* of famous sixteenth-century authors Enea Vico and Hubert Goltz. Many works by Charles Patin, and a multitude of titles from the pen of Jean Foy-Vaillant are also included, along with works by Orsini, Le Pois, Du Choul, Savot,

Haym, Spanheim, Beger, Sambucus, Occo, Banduri, Paruta, Hardouin, Agustín, and many others.

As might be expected, the library contains most of the major works devoted in all or in part to English coins and medals. Works with a wider compass include William Camden's *Britannia* and *Remains*, various volumes of which are scattered throughout the forty daily sale sessions. The 1632 edition of John Speed's *History of Great Britain* is present, as is his 1676 continuation, the *Theatre*. William Nicolson's *English, Scottish, and Irish Historical Libraries* are represented, both individually and in a collected edition. The first (1726) and second (1745) editions of the first comprehensive account of English coinage, Stephen Martin Leake's *Historical Account of English Money* are both present, as are multiple copies of Folkes's own work on the gold and silver coins and the famous series of Pembroke plates. James Anderson's 1739 folio on Scottish numismatics and Wise's 1750 *Catalogue* are represented. Works on English medals include John Evelyn's pioneering 1697 *Discourse* and the section on the topic appearing in Rapin's *History of England*. George Vertue's 1753 delightful catalogue of the numismatic works of Thomas Simon must also be mentioned. Works on orders and decorations include those by Ashmole and Anstis. Bishop William Fleetwood's *Sermon against Clipping* and *Chronicon Preciosum* both are included as are other titles emphasizing technical and economic aspects of English coinage by Vaughan, Vallavine, Lowndes, Newton, Wood, Hooper, and others. Several lots in the sale comprise groupings of monographs related to the controversies surrounding the re-coinage of English silver coins under William III and other British monetary disputes which, alas, are not individually described. Appearing in the "Manuscripts, & c." section of the catalogues are two items of exceptional interest: "Sir Isaac Newton's Letter to the Treasury on the Coin in the Year 1717" and "An Abstract of the Accounts of Thomas Neale Esq. of the Mint."

Other works in the library worthy of note include the extremely rare 1691 edition of Elias Brenner's monumental work on Swedish numismatics (lot 3826), and the 1702 folio first edition of *Médailles sur les principaux événements du règne de Louis le Grand*, "avec la Préface" (lot 4760). Another grand highlight is a quite special copy, printed on vellum, of Enea Vico's first book, *Le imagini con tutti i reversi trovati et le vite de gli imperatori* (lot 4466). The wealth of works on medieval and modern coins and medals of the continent and beyond are generally not

represented, unless their content featured information relevant to British numismatics.

While less than ideal, the following compilation of numismatic works in the 1756 Martin Folkes library sale is presented in sequential order.¹ An organization by date of publication or one by topic was considered but the chosen arrangement was deemed best if imperfect. It may require a measure of intestinal fortitude, or perhaps just an obsessive love of books, to expend the time necessary to fully review the listings, each with commentary, that follow. If, like me, you are sufficiently deranged, you may even enjoy it.

A COMPILATION OF NUMISMATIC AND RELATED WORKS
IN THE FOLKES LIBRARY

71 Folkes's Table of English Coins — — 1745 [[4°]]

One of the earliest comprehensive works on English coinage and the first of five, possibly six, copies interspersed in the forty-one-day sale. Martin Folkes published the second edition of his "A Table of English Gold Coins..." in 1745, the same year that his first edition of "A Table of English Silver Coins..." was issued. The works are nearly always bound together. The present example and two of the four that follow feature "Table" instead of "Tables" in their description, raising a remote possibility that they comprise only one of the two titles. Dekesel F149. Goldsmith 8174. Lipsius 129-130. Manville 133 & 133a.

87 Lipsii Opera omnia, 7 Tom. — *Antw. ap. Plant.* 1614 [[4°]]

This early collected edition of the works of the humanist and classical scholar Justus Lipsius (1547-1606); presumably it includes the numismatically relevant works recorded by Dekesel.

Dekesel L99-L105.

116 Wisei Catalogus Nummorum Antiquorum in Scriniis Bodleianis
— — *Oxon.* 1750 [[2°]]

The handsome and imposing oversize folio volume recording the numismatic collection belonging to the Bodleian Library at the University of Oxford. Compiled by Francis Wise, Radcliffe Librarian, it begins with ancient Greek and Roman coins but also includes Jewish, Arabic, and Anglo-Saxon coins.

[[Dekesel W196]]. Lipsius 439. Manville 142.

¹ For the modern reader long "s" has been changed to short "s" throughout, but other orthographic and typographic archaisms and peculiarities have been transcribed as they are in the original catalogue.

129 A Collection of Greek and Roman Medals, *finely engraved*. [2°]
An unknown quantity of unattributed plates depicting coins in the Folkes library (*vide* lot 5122).

173 Ursati Explanatio Notarum & Litterarum in Antiquis Lapidibus, Marmoribus, &c. — *Par.* 1723 [8°]

A work by Sertorio Ursato/Orsato, mainly on ancient glyptic art and marbles. [Dekesel O71]. Lipsius 173.

201 Rosini Antiquitates Romanæ — *L. Bat.* 1663 [4°]

A later edition of a popular work by Johannes Rosinus, i.e., Johann Rosfeld, with input from Thomas Dempster and Andreas Schott.

Dekesel R82.

215 Description de la Limagne d'Auvergne, par Symeon Lyon. 1561 [4°]

A French translation by Antoine Chappuys of a work by the Italian humanist Gabriello Simeoni or Symeoni (1509–1575), “avec plusieurs Medailles, Statues, &c.” (*vide* lot 2286).

Dekesel S160. Lipsius 372.

220 Pharmacopœia Londinensis, 1746 — Tylori Marmor Sandvicense, *Cant.* 1743. — ejusdem Comment. ad L. Decemviralem de Inope Debitoris, &c. *Cant.* 1742. — Rutherford de Immolatione Isaaci, *Cant.* 1746 — Middletonus de Conditione Medicorum Romæ — Rutherford Ordo Institutionum Physicarum — Ruttys Urinary Passages — — 1726 [4°]

An uncharacteristically long lot description featuring a work with significant numismatic content by the English classical scholar John Taylor (1704–1766). Entitled *Marmor Sandvicense*, in the main it is a commentary on the inscription found on an ancient marble brought from Greece by Lord Sandwich.

[Dekesel T14]. Lipsius 392.

229 *Los Discursos de la Religion de los Antiquos Romanos, y Griegos, del de Choul* — — *Leon.* 1579 [4°]

A Spanish translation of Guillaume du Choul's famous *Discourses* on ancient Roman coins and religion, first published in 1556.

Dekesel D23. Lipsius 82.

277 Camden's Remains concerning Britain — 1674 [8°]

The seventh and last edition of William Camden's famous *Remaines* often con-

sidered to be the best. All but the first 1605 edition feature a chapter on money; all feature numismatic content.

Dekesel C25. Lipsius 65 (citing a 1646 Amsterdam edition). Manville 38.

325 *Roma Antica, di Nardini — Rom.* 1666 [4°]

A monumental work on ancient Rome by the Italian archaeologist Famiano Nardini.

Dekesel N1. Lipsius 282.

335 *Discours sur Medailles antiques, par Savot Par.* 1627 [4°]

An important early French work by Louis Savot on ancient coins.

Engel et Serrure 5898. Lipsius 349. Dekesel S49.

340 Simons's [sic] *Medals, Coins and Great Seals*, by Vertue 1753 [4°]

George Vertue's delightfully illustrated *Medals, Coins, Great-Seals, Impressions, from the Elaborate Works of Thomas Simon, Chief Engraver of the Mint*.

The *editio princeps* of this substantial study of an individual English medalist, it was the first of the genre until well into the nineteenth century. Here, as elsewhere (lots 691 and 4192 for example), the best edition was published after Folkes's death (not until 1780 in the present instance).

[[Dekesel V65]]. Manville 146.

342 *Numismata Comitum Pembrochiæ —* 1746 [4°]

The first of no less than nine copies of this extensive multi-part assemblage of plates engraved by Nicola Francesco Haym (*vide* lot 725), depicting the remarkable collection formed by Thomas Herbert, 8th Earl of Pembroke. It comprises two engraved titles, two drop-titles, and 306 engraved plates of ancient, British, colonial, and foreign coins and medals. No publisher or place of publication is cited but the presence of so many copies in his library suggests that Folkes may have played a role in its production and distribution. The plates of ancient coins are "in tres partes divisa," and the fourth and final installment of 41 plates is entitled "Nummi Anglici et Scotici cum Aliquot Numismatibus Recentioribus." Included therein are the first printed depictions of American colonial coins, among them the infamous Good Samaritan shilling.

[[Dekesel P242]]. Lipsius 310. Manville 136.

349 *Tracts on Monies and Coin.* [4°]

One of several lots in the sale presumably comprised of monographs related to the controversy surrounding the re-coinage of English silver coins under William III and other British monetary disputes.

362 [[Spelman]] Vita Ælfredi Magni — Oxon. 1678 [[2°]]

Sir John Spelman's biography of King Alfred the Great, translated into Latin and featuring text on Anglo-Saxon coins, along with five plates depicting them, some for the first time.

Dekesel S193. Lipsius 378. Manville 41.

371 Histoire de Louis le Grand, par Medailles, par Menestrier Par. 1691 [[2°]]

The handsomely produced work on the medals of Louis XIV by the Jesuit Father Claude-François Méneſtrier (*vide* lot 3214).

Dekesel M87. Engel et Serrure 4543. Lipsius 258.

403 Kennett's Antiquities of Rome — 1699 [[8°]]

"The Second Edition with Large Additions" of Basil Kennett's *Romæ Antiquæ Notitia, Or, the Antiquities of Rome*.

Dekesel K3. Lipsius 207 (citing the 1731 ninth edition)

411 Histoire des Empereurs Romains, par Suetone Par. 1663 [[8°]]

One of a goodly number of editions in the Folkes library of *Lives of the Twelve Caesars* and other works written by the ancient Roman scholar and historian Gaius Suetonius Tranquillus.

Dekesel S292.

441 *Pratica delle Medaglie, di Patino* — Ven. 1673 [[8°]]

An Italian edition of the famous 1665 *Introduction* to numismatics, written by the prolific and talented numismatic author Charles Patin. It was his most popular work, translated into many languages.

Only a 1692 edition was issued, sans numismatic depictions (“illustrated” was apparently intended to mean “illuminated”). That said, the work shed relatively little light on the coins themselves.

2131 *Lettre de Mons. Boze sur une Medaille Antique de Smyrne, du Cabinet de Mons. le Comte de Thomas* [[*sic*]], qui y joint sa Response,
— *Haye*, 1744 [[4°]]

A published exchange between the scholar and numismatist Claude Gros de Bose (1680–1753), and the German art collector Frederic Count de Thoms (1669–1746), devoted to an ancient coin of Smyrna in the latter’s collection.

Dekesel G305. Lipsius 55.

2147 *Brenneri Thesaurus Nummorum Sueo-Gothicorum Vetustus*, —
— *Holmiæ*, 1741 [[*sic*]] [[4°]]

The second, last, and best edition, published in 1731, of the great classic work on Swedish numismatics written by Elias Brenner. *Vide* lot 3826.

Dekesel B527. Lipsius 57.

2170 *Familiæ Romanæ ex Antiq. Numismat. ex Bibliotheca Ursini & Augustini*, — *Rom.* 1577 [[2°]]

The first edition of Fulvio Orsini’s massive work on Roman Republican numismatics, with over 200 plates depicting both sides of some 750 coins. *Vide* lots 610 and 4102.

Dekesel O4. Lipsius 17 (under Antonio Agustín, i.e., Augustini) & 408.

2177 *L’Historia Augusta, illustrata dell’ Medaglie, da Angeloni, Rom.*
1685 [[2°]]

The second, expanded edition of Francesco Angeloni's major work on ancient Roman coins, based on his collection and edited by Giovanni Pietro Bellori. Dekesel A50. Lipsius 10 and 35.

2228 *Lives of the Roman Empresses*, 3 Vol. — 1752 [8°]

An enduring work, *Les femmes des douze Césars* by Jacques Roergas de Serviez was first published in Paris in 1718 (*vide* lot 3126). The first complete edition in English appeared as three volumes in 1752, translated by the Hon. Bysse Molesworth.

Lipsius 369 (citing a 1721 Amsterdam edition).

2285 Seldenus de Nummis, & Biblioth. Nummaria, 1675 [4°]

A composite work published in London featuring the *Liber de Nummis*, a work attributed to John Selden but probably written by Alessandro Sardi. It is accompanied by the first major numismatic bibliography, Philippe Labbé's *Bibliotheca Nummaria*, first published in 1664.

Dekesel L4. Lipsius 217.

2286 *Description de la Limagne d'Auvergne, avec plusieurs Medailles, Statues, &c. par Symeon, Lyon. 1561 [4°]*

Vide lot 215.

2289 *Account of Dutch Coins, in Low Dutch*, 2 Vol. [4°]

Any reasonable attempt at an attribution appears to be nearly impossible given the uncertainty of the language (i.e., vernacular Dutch or German) and, more significantly, the absence of a title, author, date, or place of publication. As suggested by Christian Dekesel, it may be a "Coin Book," perhaps including content on English coins in circulation at the time. *Vide* lot 3037.

2315 *Achillis Statii Imagines illustrium Virorum, C. T. F. D. [2°]*

Achilles Statius, i.e., Aquiles Estaço (1524–1581), was a Portuguese author whose 1569 "Images of Famous Men"—here handsomely bound in morocco with gilt page edges—was printed in Rome by the engraver and publisher Antonio Lafreri.

2366 Observations on Coin, — — 1730 [[8°]]

Perhaps *Observations upon the Present State of our Gold and Silver Coins*, 1730. Written by John Conduitt (1688–1737), Master of His Majesty's Mint, *Observations* was not published until 1774, "from an original manuscript formerly in the possession of the late Dr. Jonathan Swift." The present lot may be a handwritten copy of the original manuscript. Swift's library was sold at auction in 1746, a year after his death, raising the exciting if highly unlikely possibility that this is Swift's "original manuscript."

2513 *Life of Dr. Clarke, and other Tracts by Whiston. — Renold's Hist. of Ancient Coins, and other Tracts.* [8°]

The second work appears to be an obscure eighteenth-century tract by George Renolds, entitled "The History of Ancient Coins, Weights and Measures, Including the Life and Glorious Actions of King Solomon: . . . Also a Calculation

of the Value of Ancient Money Reduced to the Standard of our British Coin.” Not found in the bibliographies consulted.

2526 *Numismata Uxorum Imperatorum*. [4°]

Three ubiquitous Latin words do not an attribution make, nor do their English equivalents: “Coins of Imperial Wives.” The 1597 or 1599 edition of *XII. Primorum Caesarum et LXIII Ipsorum Uxorum et Parentum ex Antiquis Numismatibus* by Levinus Hulsius may be a possibility.

2531 *Antiquity and Use of Seals in England*, 1740 [4°]

A dissertation by the English clergyman and antiquarian John Lewis. Not found in the bibliographies consulted.

2537 *Dissertation sur douze Medailles des Jeux Seculaires de L'Emp.*

Domitien, par Rainssant, *Versailles* 1684 [4°]

A scarce work on the topic by Pierre Rainssant (1640–1689), “Medecin, Antiquaire & Garde Medailles de sa Majesté.”

Dekesel R1. Lipsius 324.

2539 *Scelta de Medaglioni piu rari nella Bibliotheca del Cardinale Carpegna*, — — *In Roma* 1679 [4°]

The profusely illustrated numismatic iconography produced by the Italian painter and engraver Giovanni Angelo Canini (1617–1666).

Dekesel C31. Lipsius 66.

2563 *Symbolica Dianæ Ephesiæ Statua, a Claudio Menetreio Exposita, cum Notis Bellorii*, C. T. *Romæ* 1688 [2°]

The second and best edition of this seemingly off-topic work by Claudius Menetreius, i.e., Claude Menestrier. It features additional content by Lucas Holstein

and *Notæ in Numismata tum Ephesia* by Pietro Bellori, with numismatic illustrations depicting the many-breasted form of Diana of Ephesus.

Dekesel M85. Lipsius 258 (citing 1657 and 1690 editions).

2567 Vaillant Nummi antiqui Familiarum Romanarum, 2 Vol. *Amst.* 1703 [2°]

The first edition of an important and extensive work on ancient Roman numismatics by Jean Foy-Vaillant, featuring 152 handsomely engraved plates of coins.

Mulder and Purves 84-1.

2676 *Traité Historique des Monnoies de France*, par Mons. le Blanc, — — — *Par.* [4°]

An indispensable landmark work, the first comprehensive reference on French metropolitan coins. Written by François Le Blanc, the example in the Folkes library is clearly the rare 1690 first edition, either with the imprint of Charles Robustel or that of Jean Boudot. A fairly ubiquitous reprint was published in 1692 in Amsterdam.

3684 *Folkes's Tables of Ancient Coins, L. P.* — 1745 [4°]

Vide lot 71? What to make of "Ancient" in the above title? Although Folkes composed a dissertation on the weights and values of ancient coins in 1733, it appears not to have been published, surely not in 1745. That leaves the 1745 "Tables of English Coins," copies of which were so plentiful in his library. The designation of the present example as one on L(arge) P(aper) lends credence to the latter attribution since a small number of copies were so issued.

4466 *Imagini con Riversi, & Vite de Imperatori dalle Medaglie, da Enea Vico, impres. in Pergam.* M. G. L. 1548 [[4°]]

Enea Vico's earliest numismatic treatise and the first book to depict reverse images of Roman imperial coins. Bound in morocco with gilt page edges, it appears to be a remarkable example, "impres(sum) in Pergam(entum)," i.e., printed on vellum. A number of Vico's elegantly produced numismatic works are present in the Folkes library but none, it would appear, are as magnificent as this special copy of *Le imagini*

Dekesel V15.

4471 *Ænei Vici Numismata Imperatorum, Venet.* 1560 [[4°]]

Dekesel S157. Lipsius 372.

4586 *Discours sur les Medailles et Graveures Antiques*, par Le Pois, G. L. — — *ibid.* [Par.] 1579 [4°]

The first and only edition of an important early numismatic work on ancient coins by the French physician and amateur archaeologist Antoine Le Pois. Its graphic depiction of Priapus was often excised; given its owner's irreligious views one would expect the engraved plate to remain intact in this copy.

Dekesel L17. Lipsius 317.

4589 *Le Imagini con i Riversi & Vite de gli Imperatori, da Æneo Vico*, G. L. — — *Vineg.* 1548 [4°]

Vide lot 4466. Apparently a garden-variety copy printed on paper, though with gilt page edges. The book was issued without instructions to the binder, resulting in different arrangements of the contents, of which this may be one.

4590 *Le Imagine dell Donne Auguste con le Vite, da Æneo Vico*, G. L. — — *ibid.* [Vineg.] 1557 [4°]

Another delightful work by Enea Vico, with 63 fine full-page numismatic engravings, mainly depicting Roman empresses, many within delightful historiated borders. Along with his richly illustrated work on the coins of Julius

Caesar (*vide* lot 4471), it is considered to be one of the most finely produced Italian books of the sixteenth century.

Dekesel V21.

4600 *Æneæ Vici Imagines Cæsarum*, C. T. F. D. *Venet.* 1552 *[[sic]]* *[[4°]]*
The publication date appears to be incorrect. Both Dekesel and Lipsius record a 1553 first edition of Enea Vico's *Omnium Caesarum*, soon followed by a 1554 second edition (*vide* lot 4330).

4760 *Medailles sur les principaux Evenemens du Regne de Louis le*

Grand, avec la Preface, C. M. C. T. F. D. *Par. de l'Imp. Roy.* 1702 [2°]

One of the most sumptuous numismatic books ever produced, a remarkable paean to the Sun King produced under the auspices of the Académie Royale des Médailles et des Inscriptions. The example at hand is bound in morocco with gilt page edges, and likely with the royal arms impressed in gilt on both covers.

Furthermore, it includes the suppressed preface, condemned by Louis for being overly laudatory and found only in a small number of early copies.

4869 *Budelius de Monetis & Re Nummaria, Col. Agr.* 1591 [4°]

A wide-ranging work by Renier Budel, a jurist who specialized in monetary matters. It features several woodcuts of sixteenth-century and ancient coins as well as woodcuts of coin weights, a scale, a furnace, counters, etc.

Dekesel B 160–162. Lipsius 60.

4875 *Æneæ Vici Imagines Augustarum, C. M. C. T. F. D. Ven.* 1558
[4°]

A Latin translation of Enea Vico's 1557 work, largely devoted to the coins of the Roman empresses. A handsome example on large paper, bound in morocco with gilt page edges.

Dekesel V22. Lipsius 422.

4876 *Oisellii Thesaurus Numismatum, C. T. F. D. Amst.* 1677 [4°]

The first and only edition of Jacob Oisel's illustrated work on ancient Roman coins.

Dekesel O10. Lipsius 295.

4890 *Reliquiæ Antiquæ Urbis Romæ, par Overbeke, 3 Vol. Amst.* 1708
[2°]

A substantial, handsomely illustrated work on ancient architecture and art by Dutch engraver Bonaventura van Overbeke.

[[Dekesel O91]]. Lipsius 302.

4950 *Patarol Series Augustorum, Augustarum, &c. Venet.* 1702 [8°]

The first edition of Lorentio Patarol's noteworthy illustrated work on coins from the time of Julius Caesar to Emperor Leopold I.

[[Dekesel P46]]. Lipsius 307.

4966 *Vaillant Numismata Imperatorum, &c. C. T. F. D. Par.* 1698 [4°]

Another noteworthy work by Jean Foy-Vaillant, in which he lists the source of each coin catalogued.

Lipsius 409.

4987 *Histoire de France*, par Mezeray, 3 Tom. C. M. *Par.* 1668 [4°]
François Eudes de Mezeray's folio three-volume *Histoire de France* was first published in 1643, followed by this useful "abregé chronologique ou extraict" in quarto.

Dekesel M120. Lipsius 260-261 (the main work).

4993 Vaillant *Numismata Imperat. Rom. præstantiora*, 3 Tom. *Rom.* 1743 [4°]

The best edition of this classic work by Jean Foy-Vaillant (1632-1706), perhaps his most notable contribution to numismatics. Published nearly four decades after his death, it was ably revised and edited by J. F. Baldini.

Dekesel F170. Lipsius 409.

5048 Wood's *Survey of Trade, and on Money and Bullion*, 1718 [8°]
Not that William Wood (1671-1730), but his namesake (1679-1765), who wrote the present work and later became secretary to the Commissioners of His Majesty's Customs. Arranged in four parts, his *Survey*, in the final part, discusses "considerations on our money and bullion," including the "Scarcity of silver coin" and "The means of procuring a plenty and free circulation of both species."

Goldsmith 5424. Kress 3082.

5079 Lord Pembroke's *English and Scots Medals*. [4°]

Apparently the final section alone of the famous iconography of the Pembroke collection (*vide* lot 342), entitled "Nummi Anglici et Scotici, cum Aliquot Numismatibus Recentioribus."

5088 Folkes's *Table of English Coins*, — 1745 [4°]

Vide lot 71.

5089 Simon's *Medals, Coins, and great Seals*, by Vertue, 1753 [4°]

Vide lot 340.

5093 Q. Curtius, C. T. F. D. — *ibid.* [Par.] 1678 [4°]

One of a multitude of editions of the biography of Alexander the Great by the Roman historian Quintus Curtius Rufus.

Dekesel C281.

5113 The Statutes of the most noble Order of the Garter, 4to.

This and the remaining three items are listed under the heading: "Manuscripts, &c." An illuminated manuscript with the above title, ascribed a date of 1713, was sold at auction by Christie's in 2010 and was subsequently listed and reported sold by a London antiquarian book dealer.

5115 Newtoni Lectiones Opticæ, & de Systemate Mundi, juxta exemplar in Bibliotheca publica Academiæ Cantabrigiensis; at the end of which is Sir Isaac Newton's Letter to the Treasury on the Coin in the Year 1717. *Compact. in corio Russico*, 3 Vol. 4to.

The original manuscripts of *Lectiones Opticæ* (first published in 1729) and *De Mundi Systemate Liber* (first published in 1728) are held by the Cambridge University Library. Whether the two works present here are printed or handwritten renditions is unclear, as is the composition of Newton's September 21, 1717, report to the Lords Commissioners of His Majesty's Treasury on the "State of the Gold and Silver Coins of This Kingdom in Weight and Finess...and What Method May Be Best for Preventing the Melting Down of the Silver Coin..." The report precipitated a December 22, 1717, royal proclamation changing the bimetallic relationship between gold coins and silver coins, resulting in a silver shortage as silver coins were used to pay for imports, while exports were paid for in gold. It effectively moved Britain from the silver standard to its first gold standard.

Manville 75 and 89.

5122 Lettre de Mons Gheisel sur un Globe Terrestre, fait par Martin Behaim, 1492.—Some Prints of Coins.— —A Copy of a Map of the World painted about 400 years ago in a MS. of Matthew Paris, now in the Cotton Library, a *Drawing*.

Present here is another unknown quantity of unattributed plates in the Folkes library depicting coins (*vide* lot 129).

5124 Mr. Wood's Extract of the Council Books concerning Money and Coinage from the Restoration.—An Abstract of the Accounts of Thomas Neale Esq. of the Mint, fol.

Presumably two manuscript accounts, the latter derived from the predecessor of Sir Isaac Newton at the Mint.
