PART I

Basic Medical Microbiology

- Chapter 1 **Microbial Taxonomy, 2**
 Classification, 2
 Nomenclature, 2
 Identification, 3
- Chapter 2 **Bacterial Genetics, Metabolism, and Structure, 5**
 Bacterial Genetics, 5
 Bacterial Metabolism, 17
 Structure and Function of the Bacterial Cell, 21
- Chapter 3 **Host-Microorganism Interactions, 26**
 The Encounter between Host and Microorganism, 26
 Microorganism Colonization of Host Surfaces, 28
 Microorganism Entry, Invasion, and Dissemination, 32
 Outcome and Prevention of Infectious Diseases, 40

PART II

GENERAL PRINCIPLES IN CLINICAL MICROBIOLOGY

SECTION 1: SAFETY AND SPECIMEN MANAGEMENT

- Chapter 4 **Laboratory Safety, 45**
 Chemical Safety, 47
 Fire Safety, 48
 Electrical Safety, 49
 Handling of Compressed Gases, 49
 Biosafety, 49
 Exposure Control Plan, 51
 Employee Education and Orientation, 51
 Disposal of Hazardous Waste, 51
 Standard Precautions, 52
 Engineering Controls, 54

Classification of Biologic Agents Based on Hazard, 57
 Mailing Biohazardous Materials, 58

- Chapter 5 **Specimen Management, 62**
 General Concepts for Specimen Collection and Handling, 62
 Specimen Workup, 76

SECTION 2: APPROACHES TO DIAGNOSIS OF INFECTIOUS DISEASES

- Chapter 6 **Role of Microscopy, 78**
 Bright-Field (Light) Microscopy, 78
 Phase Contrast Microscopy, 85
 Fluorescent Microscopy, 86
 Dark-Field Microscopy, 90
 Electron Microscopy, 91
- Chapter 7 **Traditional Cultivation and Identification, 93**
 Principles of Bacterial Cultivation, 93
 Bacterial Cultivation, 103
 Principles of Identification, 105
 Principles of Phenotype-Based Identification Schemes, 113
 Commercial Identification Systems, 117
 Chromatography, 119
- Chapter 8 **Nucleic Acid–Based Analytic Methods for Microbial Identification and Characterization, 120**
 Overview of Molecular Methods, 120
- Chapter 9 **Immunochemical Methods Used for Organism Detection, 147**
 Production of Antibodies for Use in Laboratory Testing, 147
 Principles of Immunochemical Methods Used for Organism Detection, 148

- Chapter 28 *Vibrio, Aeromonas, Plesiomonas, and Chromobacterium*, 371
 General Characteristics, 371
 Epidemiology, 371
 Pathogenesis and Spectrum of Disease, 371
 Laboratory Diagnosis, 373
 Antimicrobial Susceptibility Testing and Therapy, 378
 Prevention, 378
- SECTION 9: GRAM-NEGATIVE BACILLI AND COCCOBACILLI (MACCONKEY-NEGATIVE, OXIDASE-POSITIVE)**
- Chapter 29 *Sphingomonas paucimobilis* and Similar Organisms, 380
 General Considerations, 380
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 380
 Laboratory Diagnosis, 380
 Prevention, 382
- Chapter 30 *Moraxella*, 384
 General Characteristics, 384
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 384
 Laboratory Diagnosis, 384
 Prevention, 387
- Chapter 31 *Eikenella* and Similar Organisms, 389
 General Characteristics, 389
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 389
 Laboratory Diagnosis, 389
 Prevention, 392
- Chapter 32 *Pasteurella* and Similar Organisms, 393
 General Characteristics, 393
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 393
 Laboratory Diagnosis, 393
 Prevention, 396
- Chapter 33 *Actinobacillus, Kingella, Cardiobacterium, Capnocytophaga, and Similar Organisms*, 397
 General Characteristics, 397
 Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 397
- Laboratory Diagnosis, 397
 Prevention, 402
- SECTION 10: GRAM-NEGATIVE BACILLI AND COCCOBACILLI (MACCONKEY-NEGATIVE, OXIDASE-VARIABLE)**
- Chapter 34 *Haemophilus*, 403
 General Characteristics, 403
 Epidemiology, 403
 Pathogenesis and Spectrum of Disease, 403
 Laboratory Diagnosis, 403
 Antimicrobial Susceptibility Testing and Therapy, 407
 Prevention, 409
- SECTION 11: GRAM-NEGATIVE BACILLI THAT ARE OPTIMALLY RECOVERED ON SPECIAL MEDIA**
- Chapter 35 *Bartonella* and *Afipia*, 410
Bartonella, 410
Afipia felis, 414
- Chapter 36 *Campylobacter, Arcobacter, and Helicobacter*, 416
Campylobacter and *Arcobacter*, 416
Helicobacter, 421
- Chapter 37 *Legionella*, 424
 General Characteristics, 424
 Epidemiology and Pathogenesis, 424
 Spectrum of Disease, 425
 Laboratory Diagnosis, 426
 Antimicrobial Susceptibility Testing and Therapy, 428
 Prevention, 428
- Chapter 38 *Brucella*, 430
 General Characteristics, 430
 Epidemiology and Pathogenesis, 430
 Spectrum of Disease, 431
 Laboratory Diagnosis, 431
 Antimicrobial Susceptibility Testing and Therapy, 433
 Prevention, 433

- Chapter 39 ***Bordetella pertussis* and *Bordetella parapertussis*, 435**
 General Characteristics, 435
 Epidemiology and Pathogenesis, 435
 Spectrum of Disease, 435
 Laboratory Diagnosis, 436
 Antimicrobial Susceptibility Testing and Therapy, 438
 Prevention, 438
- Chapter 40 ***Francisella*, 440**
 General Characteristics, 440
 Epidemiology and Pathogenesis, 440
 Spectrum of Disease, 440
 Laboratory Diagnosis, 440
 Antimicrobial Susceptibility Testing and Therapy, 442
 Prevention, 442
- Chapter 41 ***Streptobacillus moniliformis* and *Spirillum minus*, 444**
Streptobacillus moniliformis, 444
Spirillum minus, 445
- SECTION 12: GRAM-NEGATIVE COCCI**
- Chapter 42 ***Neisseria* and *Moraxella catarrhalis*, 447**
 General Characteristics, 447
 Epidemiology, 447
 Pathogenesis and Spectrum of Disease, 447
 Laboratory Diagnosis, 447
 Antimicrobial Susceptibility Testing and Therapy, 452
 Prevention, 452
- SECTION 13: ANAEROBIC BACTERIOLOGY**
- Chapter 43 **Overview and General Considerations, 455**
 General Characteristics, 455
 Epidemiology, 455
 Pathogenesis and Spectrum of Disease, 456
 Specimen Collection and Transport, 457
 Anaerobic Media, 459
 Prevention, 461
- Chapter 44 **Laboratory Considerations, 463**
 Macroscopic Examination of Specimens, 463
 Direct Detection Methods, 463
 Cultivation, 463
 Approach to Identification, 466
 Antimicrobial Susceptibility Testing and Therapy, 476
- SECTION 14: MYCOBACTERIA AND OTHER BACTERIA WITH UNUSUAL GROWTH REQUIREMENTS**
- Chapter 45 **Mycobacteria, 478**
Mycobacterium tuberculosis Complex, 478
 Nontuberculosis Mycobacteria, 481
 Laboratory Diagnosis of Mycobacterial Infections, 486
 Antimicrobial Susceptibility Testing and Therapy, 505
 Prevention, 508
- Chapter 46 **Obligate Intracellular and Nonculturable Bacterial Agents, 510**
Chlamydia, 510
Rickettsia, *Orientia*, *Anaplasma*, and *Ehrlichia*, 518
Coxiella, 521
Tropheryma whipplei, 522
Calymatobacterium granulomatis, 522
- Chapter 47 **Cell Wall–Deficient Bacteria: *Mycoplasma* and *Ureaplasma*, 525**
 General Characteristics, 525
 Epidemiology and Pathogenesis, 525
 Spectrum of Disease, 526
 Laboratory Diagnosis, 526
 Susceptibility Testing and Therapy, 529
 Prevention, 532
- Chapter 48 **The Spirochetes, 533**
Treponema, 533
Borrelia, 536
Leptospira, 539

PART IV Parasitology

- Chapter 49 **Laboratory Methods for Diagnosis of Parasitic Infections, 543**
- General Characteristics, 544
 - Epidemiology, 544
 - Pathogenesis and Spectrum of Disease, 547
 - Laboratory Diagnosis, 558
 - Approach to Identification, 564
 - Organism Identification, 578
 - Antimicrobial Susceptibility Testing and Therapy, 613
 - Prevention, 615

PART V Mycology

- Chapter 50 **Laboratory Methods in Basic Mycology, 629**
- Overview of Clinical Mycology, 629
 - General Features of the Fungi, 629
 - Taxonomy of the Fungi, 632
 - Practical Classification of the Fungi, 634
 - Virulence Factors of the Medically Important Fungi, 636
 - General Considerations for the Laboratory Diagnosis of Fungal Infections, 642
 - Extent of Identification of Fungi Recovered from Clinical Specimens, 645
 - General Considerations for the Identification of Molds, 653
 - General Morphologic Features of the Molds, 657
 - Hyaline, Pauciseptate Molds: The Zygomycetes, 660
 - Hyaline, Septate, Monomorphic Molds: The Dermatophytes, 662
 - Hyaline, Septate, Monomorphic Molds: The Opportunistic Mycoses, 669
 - Hyaline, Septate, Dimorphic Molds: Systemic Mycoses, 674
 - Septate, Dematiaceous Molds, 683
 - Pneumocystis jiroveci* (an Atypical Fungus), 695

- The Yeasts, 696
- Commercially Available Yeast Identification Systems, 702
- Conventional Yeast Identification Methods, 703
- Antimicrobial Susceptibility Testing and Therapy, 704
- Antifungal Susceptibility Testing, 709

PART VI Virology

- Chapter 51 **Laboratory Methods in Basic Virology, 718**
- General Characteristics, 718
 - Viruses That Cause Human Diseases, 721
 - Laboratory Diagnosis of Viral Infection, 735
 - Prevention of Viral Infection, 767

PART VII Diagnosis by Organ System

- Chapter 52 **Bloodstream Infections, 778**
- General Considerations, 778
 - Detection of Bacteremia, 784
 - Special Considerations for Other Relevant Organisms Isolated from Blood, 794
- Chapter 53 **Infections of the Lower Respiratory Tract, 798**
- General Considerations, 798
 - Diseases of the Lower Respiratory Tract, 801
 - Laboratory Diagnosis of Lower Respiratory Tract Infections, 807
- Chapter 54 **Upper Respiratory Tract Infections and Other Infections of the Oral Cavity and Neck, 814**
- Diseases of the Upper Respiratory Tract, Oral Cavity, and Neck, 814

Diagnosis of Upper Respiratory Tract Infections, 818
Diagnosis of Infections in the Oral Cavity and Neck, 820

- Chapter 55 **Meningitis and Other Infections of the Central Nervous System, 822**
General Considerations, 822
Laboratory Diagnosis of Central Nervous System Infections, 827
- Chapter 56 **Infections of the Eyes, Ears, and Sinuses, 832**
Eyes, 832
Ears, 837
Sinuses, 839
- Chapter 57 **Infections of the Urinary Tract, 842**
General Considerations, 842
Infections of the Urinary Tract, 842
Laboratory Diagnosis of Urinary Tract Infections, 846
- Chapter 58 **Genital Tract Infections, 856**
General Considerations, 856
Genital Tract Infections, 856
Laboratory Diagnosis of Genital Tract Infections, 863
- Chapter 59 **Gastrointestinal Tract Infections, 873**
General Considerations, 873
Gastroenteritis, 873
Other Infections of the Gastrointestinal Tract, 883
Laboratory Diagnosis of Gastrointestinal Tract Infections, 885
- Chapter 60 **Skin, Soft Tissue, and Wound Infections, 891**
General Considerations, 891
Skin and Soft Tissue Infections, 891
Laboratory Diagnostic Procedures, 900
- Chapter 61 **Normally Sterile Body Fluids, Bone and Bone Marrow, and Solid Tissues, 904**
Specimens from Sterile Body Sites, 904
Laboratory Diagnostic Procedures, 909

PART VIII

Clinical Laboratory Management

- Chapter 62 **Laboratory Physical Design, Management, and Organization, 915**
Space Requirements and Organization of Work Flow, 915
Regulation of the Microbiology Laboratory, 918
Selection of Diagnostic Tests, 921
Cost Accounting, 924
Budgeting, 926
Inventory Control, 926
Interviewing and Hiring Employees, 927
Organization of the Microbiology Laboratory, 928
Design of Laboratory Handbook for Clinical Staff, 929
Design of Laboratory Requisition Form, 929
Design of Laboratory Workcard, 930
Design of Laboratory Report Form, 930
Writing a Procedure Manual, 930
Production of Statistical Reports, 932
- Chapter 63 **Quality in the Clinical Microbiology Laboratory, 934**
QC Program, 934
Specimen Collection and Transport, 934
Standard Operating Procedure Manual (SOPM), 935
Personnel, 935
Reference Laboratories, 935
Patient Reports, 935
Proficiency Testing (PT), 935
Performance Checks, 938
Antimicrobial Susceptibility Tests, 938
Maintenance of QC Records, 939
Maintenance of Reference QC Stocks, 939
QA Program, 940
Q-Probes, 940
In-House QA Audits, 940
Conducting a QA Audit, 943
Continuous Daily Monitoring, 943

Chapter 64 Infection Control, 945
 Incidence of Nosocomial
 Infections, 945
 Types of Nosocomial
 Infections, 945
 Emergence of Antibiotic-Resistant
 Microorganisms, 946
 Hospital Infection Control
 Programs, 947
 Role of the Microbiology
 Laboratory, 947
 Characterizing Strains Involved in
 an Outbreak, 948
 Preventing Nosocomial
 Infections, 948
 Surveillance Cultures, 950

**Chapter 65 Sentinel Laboratory Response
to Bioterrorism, 953**
 General Considerations, 953
 Government Laws and
 Regulations, 953
 Laboratory Response
 Network, 954

**Appendix: Answers to Case
Studies, 958**

Glossary, 973

Diagnostic Microbiology and Infectious Disease keeps you informed of the latest developments in clinical microbiology and the diagnosis and treatment of infectious diseases. Packed with rigorously peer-reviewed articles and studies in bacteriology, immunology, immunoserology, infectious diseases, mycology, parasitology, and virology. The journal examines new procedures, unusual cases, controversial issues, and important new literature. ...literature. Diagnostic Microbiology and Infectious Disease's distinguished independent editorial board, consisting of experts from many medical specialties, ensures you extensive and authoritative coverage. Diagnostic Microbiology and Infectious Disease features: - informed commentaries on. new antibiotics - rapid and cost-effective methods in the laboratory - instructive case studies with emphasis on complex circumstances - insightful editorials on important Diagnostic microbiology concentrates on the laboratory analysis of clinical specimens in cases when an infectious disease is suspected. The diagnosis of staphylococcal infections may involve clinical specimens isolated from humans, animals, or food products, as well as samples collected from the environment.
