PART I
Basic Medical Microbiology

Chapter 1  Microbial Taxonomy, 2
Classification, 2
Nomenclature, 2
Identification, 3

Chapter 2  Bacterial Genetics, Metabolism, and Structure, 5
Bacterial Genetics, 5
Bacterial Metabolism, 17
Structure and Function of the Bacterial Cell, 21

Chapter 3  Host-Microorganism Interactions, 26
The Encounter between Host and Microorganism, 26
Microorganism Colonization of Host Surfaces, 28
Microorganism Entry, Invasion, and Dissemination, 32
Outcome and Prevention of Infectious Diseases, 40

PART II
GENERAL PRINCIPLES IN CLINICAL MICROBIOLOGY

SECTION 1:  SAFETY AND SPECIMEN MANAGEMENT

Chapter 4  Laboratory Safety, 45
Chemical Safety, 47
Fire Safety, 48
Electrical Safety, 49
Handling of Compressed Gases, 49
Biosafety, 49
Exposure Control Plan, 51
Employee Education and Orientation, 51
Disposal of Hazardous Waste, 51
Standard Precautions, 52
Engineering Controls, 54

Chapter 5  Specimen Management, 62
General Concepts for Specimen Collection and Handling, 62
Specimen Workup, 76

SECTION 2:  APPROACHES TO DIAGNOSIS OF INFECTIOUS DISEASES

Chapter 6  Role of Microscopy, 78
Bright-Field (Light) Microscopy, 78
Phase Contrast Microscopy, 85
Fluorescent Microscopy, 86
Dark-Field Microscopy, 90
Electron Microscopy, 91

Chapter 7  Traditional Cultivation and Identification, 93
Principles of Bacterial Cultivation, 93
Bacterial Cultivation, 103
Principles of Identification, 105
Principles of Phenotype-Based Identification Schemes, 113
Commercial Identification Systems, 117
Chromatography, 119

Chapter 8  Nucleic Acid-Based Analytic Methods for Microbial Identification and Characterization, 120
Overview of Molecular Methods, 120

Chapter 9  Immunochemical Methods Used for Organism Detection, 147
Production of Antibodies for Use in Laboratory Testing, 147
Principles of Immunochemical Methods Used for Organism Detection, 148
Chapter 28  
*Vibrio, Aeromonas, Plesiomonas, and Chromobacterium, 371*

General Characteristics, 371  
Epidemiology, 371  
Pathogenesis and Spectrum of Disease, 371  
Laboratory Diagnosis, 373  
Antimicrobial Susceptibility Testing and Therapy, 378  
Prevention, 378  

Section 10:  
**Gram-Negative Bacilli and Cocccobacilli (MacConkey-Negative, Oxidase-Variable)**

Chapter 34  
*Haemophilus, 403*

General Characteristics, 403  
Epidemiology, 403  
Pathogenesis and Spectrum of Disease, 403  
Laboratory Diagnosis, 403  
Antimicrobial Susceptibility Testing and Therapy, 407  
Prevention, 409

Section 11:  
**Gram-Negative Bacilli That Are Optimally Recovered on Special Media**

Chapter 35  
*Bartonella and Afipia, 410*

*Bartonella, 410  
Afipia felis, 414*

Chapter 36  
*Campylobacter, Arcobacter, and Helicobacter, 416*

*Campaobacter and Arcobacter, 416  
Helicobacter, 421*

Chapter 37  
*Legionella, 424*

General Characteristics, 424  
Epidemiology and Pathogenesis, 424  
Spectrum of Disease, 425  
Laboratory Diagnosis, 426  
Antimicrobial Susceptibility Testing and Therapy, 428  
Prevention, 428

Chapter 38  
*Brucella, 430*

General Characteristics, 430  
Epidemiology and Pathogenesis, 430  
Spectrum of Disease, 431  
Laboratory Diagnosis, 431  
Antimicrobial Susceptibility Testing and Therapy, 433  
Prevention, 433

Chapter 29  
*Sphingomonas paucimobilis and Similar Organisms, 380*

General Considerations, 380  
Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 380  
Laboratory Diagnosis, 380  
Prevention, 382

Chapter 30  
*Moraxella, 384*

General Characteristics, 384  
Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 384  
Laboratory Diagnosis, 384  
Prevention, 387

Chapter 31  
*Eikenella and Similar Organisms, 389*

General Characteristics, 389  
Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 389  
Laboratory Diagnosis, 389  
Prevention, 392

Chapter 32  
*Pasteurella and Similar Organisms, 393*

General Characteristics, 393  
Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 393  
Laboratory Diagnosis, 393  
Prevention, 396

Chapter 33  
*Actinobacillus, Kingella, Cardiobacterium, Capnocytophaga, and Similar Organisms, 397*

General Characteristics, 397  
Epidemiology, Spectrum of Disease, and Antimicrobial Therapy, 397
Chapter 39  *Bordetella pertussis* and *Bordetella parapertussis*, 435
- General Characteristics, 435
- Epidemiology and Pathogenesis, 435
- Spectrum of Disease, 435
- Laboratory Diagnosis, 436
- Antimicrobial Susceptibility Testing and Therapy, 438
- Prevention, 438

Chapter 40  *Francisella*, 440
- General Characteristics, 440
- Epidemiology and Pathogenesis, 440
- Spectrum of Disease, 440
- Laboratory Diagnosis, 440
- Antimicrobial Susceptibility Testing and Therapy, 442
- Prevention, 442

Chapter 41  *Streptobacillus moniliformis* and *Spirillum minus*, 444
- *Streptobacillus moniliformis*, 444
- *Spirillum minus*, 445

Section 12: Gram-Negative Cocci

Chapter 42  *Neisseria* and *Moraxella catarrhalis*, 447
- General Characteristics, 447
- Epidemiology, 447
- Pathogenesis and Spectrum of Disease, 447
- Laboratory Diagnosis, 447
- Antimicrobial Susceptibility Testing and Therapy, 452
- Prevention, 452

Section 13: Anaerobic Bacteriology

Chapter 43  Overview and General Considerations, 455
- General Characteristics, 455
- Epidemiology, 455
- Pathogenesis and Spectrum of Disease, 456
- Specimen Collection and Transport, 457
- Anaerobic Media, 459
- Prevention, 461

Chapter 44  Laboratory Considerations, 463
- Macroscopic Examination of Specimens, 463
- Direct Detection Methods, 463
- Cultivation, 463
- Approach to Identification, 466
- Antimicrobial Susceptibility Testing and Therapy, 476

Section 14: Mycobacteria and Other Bacteria with Unusual Growth Requirements

Chapter 45  Mycobacteria, 478
- *Mycobacterium tuberculosis* Complex, 478
- Nontuberculosis Mycobacteria, 481
- Laboratory Diagnosis of Mycobacterial Infections, 486
- Antimicrobial Susceptibility Testing and Therapy, 505
- Prevention, 508

Chapter 46  Obligate Intracellular and Nonculturable Bacterial Agents, 510
- *Chlamydia*, 510
- *Rickettsia, Orientia, Anaplasma, and Ehrlichia*, 518
- *Coxiella*, 521
- *Tropheryma whippelii*, 522
- *Caldycomobacterium granulomatis*, 522

Chapter 47  Cell Wall–Deficient Bacteria: *Mycoplasma* and *Ureaplasma*, 525
- General Characteristics, 525
- Epidemiology and Pathogenesis, 525
- Spectrum of Disease, 526
- Laboratory Diagnosis, 526
- Susceptibility Testing and Therapy, 529
- Prevention, 532

Chapter 48  The Spirochetes, 533
- *Treponema*, 533
- *Borrelia*, 536
- *Leptospira*, 539
PART IV
Parasitology

Chapter 49  Laboratory Methods for Diagnosis of Parasitic Infections, 543
General Characteristics, 544
Epidemiology, 544
Pathogenesis and Spectrum of Disease, 547
Laboratory Diagnosis, 558
Approach to Identification, 564
Organism Identification, 578
Antimicrobial Susceptibility Testing and Therapy, 613
Prevention, 613

PART V
Mycology

Chapter 50  Laboratory Methods in Basic Mycology, 629
Overview of Clinical Mycology, 629
General Features of the Fungi, 629
Taxonomy of the Fungi, 632
Practical Classification of the Fungi, 634
Virulence Factors of the Medically Important Fungi, 636
General Considerations for the Laboratory Diagnosis of Fungal Infections, 642
Extent of Identification of Fungi Recovered from Clinical Specimens, 645
General Considerations for the Identification of Molds, 653
General Morphologic Features of the Molds, 657
Hyaline, Paucisepiaate Molds: The Zygomyctes, 660
Hyaline, Septate, Monomorphous Molds: The Dermatophytes, 662
Hyaline, Septate, Monomorphous Molds: The Opportunistic Mycoses, 669
Hyaline, Septate, Dimorphic Molds: Systemic Mycoses, 674
Septate, Dematiaceous Molds, 683
Pneumocystis jiroveci (an Atypical Fungus), 695

The Yeasts, 696
Commercially Available Yeast Identification Systems, 702
Conventional Yeast Identification Methods, 703
Antimicrobial Susceptibility Testing and Therapy, 704
Antifungal Susceptibility Testing, 709

PART VI
Virology

Chapter 51  Laboratory Methods in Basic Virology, 718
General Characteristics, 718
Viruses That Cause Human Diseases, 721
Laboratory Diagnosis of Viral Infection, 735
Prevention of Viral Infection, 767

PART VII
Diagnosis by Organ System

Chapter 52  Bloodstream Infections, 778
General Considerations, 778
Detection of Bacteremia, 784
Special Considerations for Other Relevant Organisms Isolated from Blood, 794

Chapter 53  Infections of the Lower Respiratory Tract, 798
General Considerations, 798
Diseases of the Lower Respiratory Tract, 801
Laboratory Diagnosis of Lower Respiratory Tract Infections, 807

Chapter 54  Upper Respiratory Tract Infections and Other Infections of the Oral Cavity and Neck, 814
Diseases of the Upper Respiratory Tract, Oral Cavity, and Neck, 814
Diagnosis of Upper Respiratory Tract Infections, 818
Diagnosis of Infections in the Oral Cavity and Neck, 820

Chapter 55  
**Meningitis and Other Infections of the Central Nervous System, 822**  
General Considerations, 822
Laboratory Diagnosis of Central Nervous System Infections, 827

Chapter 56  
**Infections of the Eyes, Ears, and Sinuses, 832**  
Eyes, 832
Ears, 837
Sinuses, 839

Chapter 57  
**Infections of the Urinary Tract, 842**  
General Considerations, 842
Infections of the Urinary Tract, 842
Laboratory Diagnosis of Urinary Tract Infections, 846

Chapter 58  
**Genital Tract Infections, 856**  
General Considerations, 856
Genital Tract Infections, 856
Laboratory Diagnosis of Genital Tract Infections, 863

Chapter 59  
**Gastrointestinal Tract Infections, 873**  
General Considerations, 873
Gastroenteritis, 873
Other Infections of the Gastrointestinal Tract, 883
Laboratory Diagnosis of Gastrointestinal Tract Infections, 885

Chapter 60  
**Skin, Soft Tissue, and Wound Infections, 891**  
General Considerations, 891
Skin and Soft Tissue Infections, 891
Laboratory Diagnostic Procedures, 900

Chapter 61  
**Normally Sterile Body Fluids, Bone and Bone Marrow, and Solid Tissues, 904**  
Specimens from Sterile Body Sites, 904
Laboratory Diagnostic Procedures, 909

**PART VIII Clinical Laboratory Management**

Chapter 62  
**Laboratory Physical Design, Management, and Organization, 915**
Space Requirements and Organization of Work Flow, 915
Regulation of the Microbiology Laboratory, 918
Selection of Diagnostic Tests, 921
Cost Accounting, 924
Budgeting, 926
Inventory Control, 926
Interviewing and Hiring Employees, 927
Organization of the Microbiology Laboratory, 928
Design of Laboratory Handbook for Clinical Staff, 929
Design of Laboratory Requisition Form, 929
Design of Laboratory Workcard, 930
Design of Laboratory Report Form, 930
Writing a Procedure Manual, 930
Production of Statistical Reports, 932

Chapter 63  
**Quality in the Clinical Microbiology Laboratory, 934**
QC Program, 934
Specimen Collection and Transport, 934
Standard Operating Procedure Manual (SOPM), 935
Personnel, 935
Reference Laboratories, 935
Patient Reports, 935
Proficiency Testing (PT), 935
Performance Checks, 938
Antimicrobial Susceptibility Tests, 938
Maintenance of QC Records, 939
Maintenance of Reference QC Stocks, 939
QA Program, 940
Q-Probes, 940
In-House QA Audits, 940
Conducting a QA Audit, 943
Continuous Daily Monitoring, 943
Chapter 64  Infection Control, 945  
Incidence of Nosocomial Infections, 945  
Types of Nosocomial Infections, 945  
Emergence of Antibiotic-Resistant Microorganisms, 946  
Hospital Infection Control Programs, 947  
Role of the Microbiology Laboratory, 947  
Characterizing Strains Involved in an Outbreak, 948  
Preventing Nosocomial Infections, 948  
Surveillance Cultures, 950

Chapter 65  Sentinel Laboratory Response to Bioterrorism, 953  
General Considerations, 953  
Government Laws and Regulations, 953  
Laboratory Response Network, 954

Appendix: Answers to Case Studies, 958

Glossary, 973
Diagnostic Microbiology and Infectious Disease keeps you informed of the latest developments in clinical microbiology and the diagnosis and treatment of infectious diseases. Packed with rigorously peer-reviewed articles and studies in bacteriology, immunology, immunoserology, infectious diseases, mycology, parasitology, and virology. The journal examines new procedures, unusual cases, controversial issues, and important new literature. Diagnostic Microbiology and Infectious Disease's distinguished independent editorial board, consisting of experts from many medical specialties, ensures you extensive and authoritative coverage. Diagnostic Microbiology and Infectious Disease features: - informed commentaries on new antibiotics - rapid and cost-effective methods in the laboratory - instructive case studies with emphasis on complex circumstances - insightful editorials on important Diagnostic microbiology concentrates on the laboratory analysis of clinical specimens in cases when an infectious disease is suspected. The diagnosis of staphylococcal infections may involve clinical specimens isolated from humans, animals, or food products, as well as samples collected from the environment.
