Principles of Human Neuropsychology, by G. Dennis Rains. 2002. Boston: McGraw Hill. 569 pp., \$80.00. Michael Daniel (a1). (a1). School of Professional Psychology, Pacific University, Portland, OR. DOI: <https://doi.org/10.1017/S1355617703240133>. Published online: 12 February 2004. Extract. The goal of this textbook, stated in the preface, is for students to "have access to an account of neuropsychology that was at once clear and in-depth," and in most respects it achieves this purpose. The book has a total of 15 chapters divided into three parts. Each chapter begins with an outline and ends with Currently, Dr. Zillmer is the Pacifico Professor of Neuropsychology at Drexel University where he teaches courses in neuropsychology, abnormal psychology, psychological assessment and sports psychology. Read more. Product details. This was the main text for my graduate neuropsychology course and it served me well. It has good explanations of concepts and is worth the money. Read more.
