REPRODUCTIVE ENDOCRINOLOGY AND FERTILITY CENTER The Reproductive Endocrinology and Infertility Center is actively involved in each of the Department of Obstetrics and Gynecology's clinical, research and educational missions, striving to bring evidence-based, compassionate, quality care to the women of Iran. We are pleased to announce our opening to receive outstanding students in our Center. Reproductive endocrinology and fertility physicians are Obstetrician-Gynecologists who have had additional training in the treatment of reproductive disorders that affect children, women, men, the mature woman, and infertility in both men and women. - Observation of Assisted Reproductive Technology (ART) procedures. Reproductive Genetics. Reproductive endocrinology and infertility (REI) is a surgical subspecialty of obstetrics and gynecology that trains physicians in reproductive medicine addressing hormonal functioning as it pertains to reproduction as well as the issue of infertility. While most REI specialists primarily focus on the treatment of infertility, reproductive endocrinologists are trained to also evaluate and treat hormonal dysfunctions in females and males outside infertility. Reproductive endocrinologists have specialty
