No visible flaws. These Amish quilts with roots in many cultures are viewed today as quintessentially American. Most first time visitors are taken aback by the great variety of design and coloring, as well as the intricacy of quilts on display. Not so obvious is the special way these quilts are produced. At a time when practically every textile product sold in America is made in a sweatshop in Asia, these Amish quilts are made one at a time in people's American homes.Â Within the Amish and Mennonite communities here, quilts have special significance. Quilts are made in these communities to mark marriages and births and therefore are made with love and special attention to detail. This same care and love can often be seen in the Amish quilts that are made for sale to outsiders.
