Hebrew Studies 38 (1997) 167 Reviews PROVERBS 1-9: A STUDY OF INNER-BIBLICAL INTERPRETATION . By Scott L. Harris. SBL Dissertation Studies 150. In the course of the book, however, he points to clear links between them and other parts of chapters 1-9 and also other parts of the book. In chapter 1, Harris reviews just three modern interpretations of chapters 1-9 by Whybray, Kayatz, and McKane. These studies, published in 1965, 1966, and 1970 respectively. are castigated for their undue emphasis on the affinities of these chapters with Egyptian models. Unfortunately they are not representative of the study of the question in recent decades and do not necessarily represent the current views of those scholars themselves. The book of Proverbs, read as a whole, presents a main topic amidst its numerous and diverse maxims and observations. This topic, scarcely touched on elsewhere in ancient Near Eastern Wisdom Literature, is wisdom-not just wise behavior or wise teachings but wisdom itself, the human intellectual power, both as knowledge and as a faculty. Concern for wisdom in this sense is to be found throughout the book; it is so pervasive that it often escapes notice. The most intensive reflection on wisdom comes in chaps. 1-9, which is a hermeneutical preamble to the rest of the book. Within this unit, there are two ideas of wisdom, each conveyed in its own voice, and each (I will argue) belonging to a different literary stratum.
