Obstetrics and Gynaecology Guidelines. All guidelines must be read in conjunction with the Disclaimer. New and Updated Guidelines. Clinical guidelines under review remain the current endorsed clinical guideline until the review is complete.Â Contraception : Barrier Methods. Contraception : Combined Oral Contraceptive Pill. Contraception : DepoProvera. Contraception : Emergency. Contraception : Implanon (Etonogestrel).Â Palliative (Neonate)- refer to Neonatology guideline: 'End of Life Care: Palliative Care, Grief and Loss'. Palliative Care. Palliative: Niki t34 Syringe Pump: Continuous subcutaneous infusion management. A recent analysis from the state of Tennessee found that two thirds of neonatal abstinence syndrome cases were associated with legal prescriptions, and 28% of women enrolled in the state Medicaid program received at least one prescription for an opioid.⁸ By 2012, nearly 22,000 neonates were born with neonatal abstinence syndrome in the United States each year, translating to one neonate.Â Hence, pregnant women with opioid use disorder have a unique set of needs and treatment must address those needs. [Back to Top | Article Outline](#). Box 1.Â Obstetrics and Gynecology Prenatal Care. â€¢ How best to structure comprehensive care to bring all resources to women. â€¢ What is the optimal assessment for fetal well-being? Obstetrics and gynaecology (British English) or obstetrics and gynecology (American English) is the medical specialty that encompasses the two subspecialties of obstetrics (covering pregnancy, childbirth, and the postpartum period) and gynaecology (covering the health of the female reproductive system â€” vagina, uterus, ovaries, and breasts). It's commonly abbreviated as OB-GYN or OB/GYN in US English, and as obs and gynae or O&G in British English.
