Presenting three, perhaps non-traditional thoughts about how to get others to favor urban density and moderated use of the automobile.

For the first time Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of the fact that he never succeeded in this endeavour is partly attributable to Benjamin's notorious discomfort at working within prescribed disciplinary boundaries, and his work, in a sense, constituted a reproach to the methodologically conservative world of traditional philosophical and social enquiry. The Industrial Revolution was a key foundation of transforming cities and the urban experience. Europeans faced issues such as pollution, health, disease, poverty, and crime. Factories were shaped identically along the riverside. This resulted in the first generation of pollution. As this development continued, the water became contaminated. Along with air pollution, this caused an uprise in new diseases such as: cholera, smallpox, typhoid, and tuberculosis. In some cases these diseases led to death.
